

Enhancing the Decision-Making of the Healthcare Provider

A suite of solutions across disciplines

Elsevier's evidence-based clinical content provides a broad spectrum of information to improve clinical outcomes and enhance the quality of care. Our solutions include:

MD Consult – The authoritative information doctors trust. No one can match its:

- **Depth and breadth of content.** MD Consult provides access to more than 50 leading textbooks, 80 medical journals and Clinics, 10,000 patient education handouts (also available in Spanish), 1,000 practice guidelines, clinically relevant drug information, 50,000 images and medical news – clinical information ranging across 30 specialties.
- **Authoritative answers.** Now used by more than 1,900 healthcare organizations, including 95 percent of U.S. medical schools, MD Consult provides answers to physicians' clinical questions with information from the authors they know and trust.
- **Smart phone access.** Available free of charge to individual MD Consult subscribers as well as participating institutions, MD Consult Mobile allows physicians to be in the know, while on the go – with clinical information available whenever and wherever needed.

First Consult – Evidence-based answers at the point of care. This solution offers:

- Integration with MD Consult and instant access to trusted Elsevier content
- Concise summaries of evidence that relate to patient care across 31 specialties
- A differential diagnosis tool for rapid evaluation of presenting signs and symptoms
- Integration with EHR applications, further improving workflow and patient care
